Technical Project Manager | Backend Developer | Solution Design & Software Delivery (Backend Focus)

Profile

Technology professional with 3+ years of experience progressing from Backend Developer to Technical Lead and IT Project Manager. Experienced in delivering SaaS platforms, ERP customizations, web applications, e-commerce solutions, and digital transformation initiatives.

Strong ability to translate business requirements into technical solutions, lead development teams, and manage full project lifecycles from analysis to deployment. Experienced in solution design, workflow optimization, and cross-functional coordination between business and technical stakeholders. Recognized for combining technical expertise, project leadership, and process improvement to drive successful project delivery.

Education

- **Master's Degree – Networks & Distributed Systems** — Abdelhamid Mehri Constantine 2 University — July 2023
- **Bachelor's Degree – Computer Science** — Abdelhamid Mehri Constantine 2 University — Juin 2021

Professional Experience

IT Project Manager — TANEMIRT TECH

2025 – May 2026

- Responsible for end-to-end delivery of software solutions across multiple clients and internal systems.
- Lead software projects from requirements gathering to deployment and client delivery.
- Coordinate developers, designers, stakeholders, and management to ensure project success.
- Define project scope, timelines, priorities, and delivery roadmaps.
- Participate in solution design, workflow optimization, and business process improvement initiatives.
- Manage SaaS platforms, ERP customizations, e-commerce projects, and enterprise web applications.

Technical Lead — DASAUTOMOTIVEAM

2024 – 2025

- Led backend development activities across multiple client and internal projects.
- Designed APIs, integrations, database structures, and system workflows.
- Mentored developers and supported architecture and infrastructure decisions.
- Acted as technical bridge between business stakeholders and development teams to translate requirements into scalable solutions.

Backend Developer — DASAUTOMOTIVEAM

2023 – 2025

- Designed and developed scalable backend systems using Spring Boot and Django
- Built REST APIs, authentication systems, and business application modules.
- Integrated third-party services and optimized PostgreSQL/MySQL databases.
- Supported cloud deployments, maintenance, and production environments.
